

VARIABLE SPEED DRIVE REPAIR SERVICES

JTD Electronics Limited operates within various Industries offering a full repair and refurbishment service to Variable Speed Drives. These Industries include Heating & Ventilation, Automation, Utilities, Transportation and General Manufacturing. From our UK base we regularly support repeat customers in the US, most of Europe, the Middle East and the Channel Islands. Amongst our customers are some of the UKs biggest blue-chip household names.

We refurbish, repair and supply Variable Speed Drives used within the Automation and HVAC Industries and their supporting environments. Our core technical competencies lie with AC Inverters and DC Drives.

We currently service and repair most makes and models of AC Inverters and DC Drives, ranging from a few hundred watts to several hundred kilowatts in output power with various AC input voltages. All of our tests include full load testing to the point of shutdown to ensure product safety.

Finding solutions to minimise your power disruption before it occurs is our strength. As well as increasing uptime, our planned refurbishment programs are an effective method of extending the life of your existing systems, and completely remove the significant disruption and expense involved in replacing them with new kit. For those unplanned catastrophic failures, our same day despatch swap-out service will have your system fully operational in next to no time. The standard repair offering is a time proven method of supporting the normal operation of your facilities.

- ✓ Full Load Testing Available
- ✓ Emergency Repair Service
- ✓ Collection and Delivery Service
